⚲ Tiruppur | ✉ kmithra746@gmail.com | ✆ 7092395325 | linkedin.com/in/mithra-kannank | github.com/MithrakannanK

EDUCATION

KIT – Kalaignarkarunanidhi Institute of Technology, Coimbatore, Tamil Nadu 2024 – 2028

B.Tech. Computer Science and Business Systems | CGPA: 8.56/10.0

Coursework: Computer Networks, Operating Systems, DBMS, Software Engineering, Cloud Computing, AI & ML

EXPERIENCE

AI/ML Intern | GTN Info Solutions MAY 2026

- Worked on a payroll software application, developing an AI-powered chatbot integrated into the application using NLP techniques.
- Enhancing chatbot performance and user interaction experience.
- Testing and optimizing conversational workflows.

PROJECTS

SmartRetina – IoT-Integrated AI Platform for Diabetic Retinopathy Screening (In Progress)

Currently developing a portable, low-cost diabetic retinopathy screening prototype that combines a smartphone, a retinal imaging lens, LED illumination and an ESP32 IoT controller. Building the hardware setup with the lens and LED mounted on a smartphone stand and designing a CNN-based AI pipeline to classify retinal images. Drafted an IEEE-format paper on the proposed system.

Tech Stack: ESP32, IoT, CNN, Python, Smartphone Imaging

Serverless File Storage System

Developed a serverless cloud-based file storage application enabling secure file upload, storage, and retrieval without managing servers. Implemented AWS S3 for object storage, AWS Lambda for backend processing, and API Gateway for RESTful API integration. Configured IAM policies to ensure secure access control and data protection.

Tech Stack: AWS S3, AWS Lambda, API Gateway, IAM, JavaScript, Node.js

GitHub Repo: github.com/MithrakannanK/SERVERLESS_FILE_STORAGE-AWS-S3-

Urban Mind AI – Tamil Nadu Smart Intelligence Platform

Developed an AI-based smart city dashboard monitoring urban systems (traffic, pollution, safety) using data analytics and visualization. Implemented live traffic visualization, analytical charts for congestion detection, and a Women Patrol Tracking system for improved public safety.

Tech Stack: React.js, HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Python, Google Maps API, SOLIDWORKS

GitHub Repo: github.com/MithrakannanK/UrbanMindAI-smart-intelligence-platform

TECHNICAL SKILLS

Languages: Java, Python
Frontend: HTML, CSS, Bootstrap, React.js
Backend: Node.js, Express.js
Database: MySQL, MongoDB, SQL, MSSQL
Frameworks: Maven, Antigravity, Spring Boot
Tools: Git, GitHub, AWS, Azure, Docker, Kubernetes
AI/ML: Deep Learning (CNN), NLP, Machine Learning
ML Models: Linear Regression, Logistic Regression, Decision Tree, Random Forest, KNN, SVM, K-Means

CERTIFICATIONS & COURSES

NPTEL – Programming in Java (Elite)
Cisco – Python Essentials
AWS Cloud Quest Practitioner
IBM – Cloud Computing
Cisco – Data Science & Intro to Cybersecurity
Cisco – Modern AI & Network Essentials
Cisco – Network Basics
MongoDB – Certification

COMPETITIVE PROGRAMMING

LeetCode : Max Rating – 1565 | Solved: 200+
CodeChef : Max Rating – 1428 | 2 Star | Problems: 800+
Codeforces : Max Rating – 1075 (max newbie)

ACHIEVEMENTS

- Secured 2nd Prize in Inter-College Paper Presentation Competition.
- Elite Certification in Programming in Java from NPTEL.
- Finalist – Code O' Clock Hackathon, CIT Coimbatore.
- 21 badges & 4 trophies from Microsoft Learn platform.

SOFT SKILLS

- Strong management skills that help me to organize tasks and lead work effectively.
- Good at solving problems through logical thinking and practical decision-making.
- Strong Communication Skills.
